

RSM Ääntä vaimentava siirtoilmalaite

Grille for transfer air between rooms.
Installing thickness 80-145 mm.

- Adjustable according to wall or door thickness
- Small pressure loss
- Easy to clean
- Absorbs sound between rooms
- Prevents visual contact between rooms

Airflow through the grille is caused by pressure difference between rooms. The grille includes sound absorbing plates to attenuate sound between rooms and absorb airflow noise. Usually installed in wall above a door.
